

Logistics Business Software

help you to achieve your
desired business result

www.i-frt.com

i-frt is a new generation business model which delivers enhanced services, seamless integration and operational services designed to manage and optimize the entire Freight Forwarding System at your finger tips.

i-frt provides best in class business solutions for freight forwarders to increase productivity, reduce costs, and optimize asset utilization. Regardless of the size and complexity of your business challenges we provide a user friendly solution that seamlessly fits your organization at an affordable price. We have different licensing models which you can select based on your convenience .

We operate and manage our service on a subscription-based pricing model providing you the privilege to review the ROI of your engagement with us and justify the business value of any aspect of the software in clear measurable terms.

i-frt was developed under the leadership of a team of highly experienced professionals and consultants having 100+ years of combined experience in Logistics and exposure to IT. Over the years we applied proven best-practices, deep domain and technology upgrades to build the freight forwarding software to a level of supremacy over competitor offerings to ensure your operations are fully optimized.

i-frt consists of a comprehensive integrated solution for freight forwarding, warehouse management and NVOCC .
